

Digital Labels—No Plates! No Dies!

Demands for more variation on shorter label runs can be answered with Unger's digital system. Our 4-color process digital presses have near photographic quality with outstanding color reproduction.

Our digital presses use UV inks that are durable even without coatings, plus you have the ability to print opaque white ink and variable black. We offer a large selection of materials from which to choose:

synthetics, papers, fluorescents, metallic, tag, environmental, even UL approved!

Digital printing eliminates the need for plates and our laser cutting system provides a tool-free method for cutting any desired shape. Without plate and tooling charges, you'll be able to order small quantities at economical prices—create multiple versions of a product label for marketing research, or decrease your inventory with smaller label runs.

With Unger, you'll receive the latest in label technology!

- No plate or tooling charges
- Cut your label any shape imaginable
- Near photographic quality
- Variable printing and barcoding
- Durable UV inks
- Ability to print opaque white ink
- Large selection of materials
- Fast turnaround
